Somfy myLink™

Now an IFTTT Service

Enjoy Radio Technology Somfy® (RTS) motorized solutions

even more with IFTTT (If This, Then That) thanks to the Somfy myLink™. IFTTT, a free web-based service, makes it possible to control your Somfy-powered solutions automatically. IF something happens in one connected service, THEN it triggers a separate action in another connected service.

For example:

IF your thermostat reaches 90 degrees on a hot summer day,

THEN your shades automatically lower to reduce the high demand on air conditioning. The result? Conserve energy and save money!
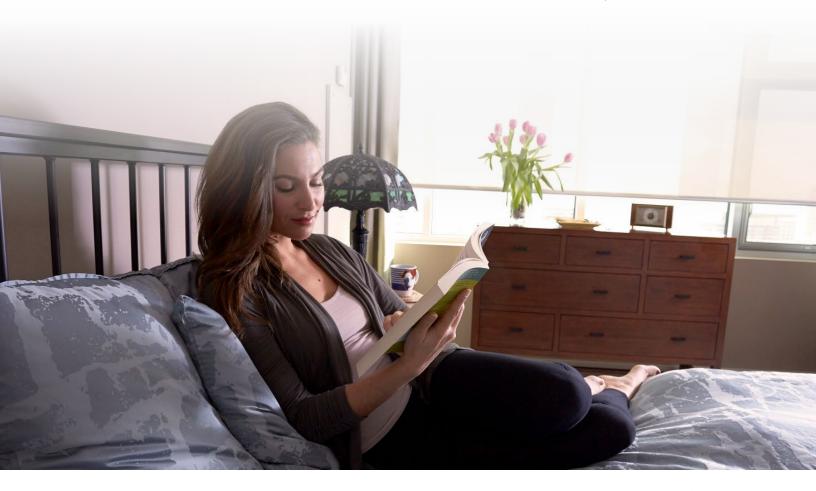

IF your connected lights dim after 9pm,

THEN your bedroom shades lower for privacy!

IFTTT

somfy® Building happiness

Get started with Applets by Somfy, or create your own for a personalized experience! Mix and match **over 600 IFTTT** services to define actions and triggers that make sense to your lifestyle. Simple conditional statements transform smart devices into a more complete smart home experience.

Want voice control? The Somfy myLink service in IFTTT lets you **do more with the services you love**!

"Hey Google, lower my bedroom shades."

Or, execute myLink scenes and schedules with simple voice commands."

"Hey Google, Good Morning."
